## Playground & Fitness Equipments

SOYLU®

a global brand

**46**  
years of experience

Our valuable customer;

first of all, thank you for sparing time to look over our catalogue.

Our company was founded in 1973. During our 46 years of history, we have been working in a quality-focused and customer satisfaction - focused way, and thanks to this we have been able to keep our success all the time.

Almost all of the products, presented in our 2018 2019 catalogue, are produced in the facilities and factory of our company. There are products in metal, plastic and wooden areas and manufacturing facilities belonging to these products.

High quality product, fair price and problem free service are the general features that a customer expects from a supplier. In addition to this, we are furnishing the service of pre-sale technical support, three dimensional project and survey. We are able to prepare visual demonstrations and comprehensive, special projects concerning the product you want to buy. These services are realized by our company's design and Research & Development department. The only thing you need to do is sending your scaled drawings belonging to your project, and giving information about your average budget that you figure for this work. Within the shortest possible time, the convenient project, which you won't be able to refuse will be sent to you.

Our company, which furnishes considerable service in outside market just as in the internal market, has a strong foreign trade department. We keep our position as a strong and important manufacturer and supplier in this area. Since %80 of our manufacture and sales are as part of export, based on this important situation the Soylu Grup 2012-2013 catalogue was especially prepared for the exporters inland and the importers abroad.

The only thing you need to do is choosing the product you need and placing your order. Your order will be delivered to you without any problems.

Chairman  
Metin SOYLU
